

300-Hour Foundational Yoga Teacher Training

About the 300-hour Program

The Foundational Yoga Teacher Training values all yogic traditions and teachings. This program is a 300-hour interdisciplinary yoga course encompassing many aspects of the yoga practice. Every individual in the training will be accepted for where they are in their practice at the present moment. It's not necessary to achieve every yoga posture in order to be a good teacher; the only requirement is a sincere desire for yoga, which is eternal happiness. Through direct experiential learning of yoga you will begin to deepen your personal practice as your teaching abilities evolve with enthusiasm. Graduates from this program will have the ability to design yoga sequences fit for healthy adults as well as an introduction to kids, teens and senior citizen routines. The goal of this training is to encourage practitioners to unfold the mind-body-spirit connection that is vital to the practice of yoga and to pass on these experiences to others. We encourage students to achieve "living yoga" through our many educational and hands-on techniques. This training qualifies you for registration with the Yoga Alliance as a RYT or Registered Yoga Teacher at the 200-hour level.

In addition, we have found that many attend teacher training for a myriad of reasons other than becoming a yoga teacher. A spiritual training such as this may acutely deepen or awaken one's own spiritual practice, enhance a chosen career path or inspire to intuitively discover one's passion and purpose in life. The community and bonding of the group can be described as uniquely delicious and infinitely orgasmic. Simply put, "it is a once in a life time experience". Please inquire how this might be for you and talk to others who have gone before you.

Yoga Styles Defined

Yoga Basics

Learn the foundational yoga postures typically practiced in a yoga-asana sequence learning precise alignment. There are 5 different class structures you will learn for Basics. This is a wonderful practice for those new to yoga or for those that are established in their practice & want to refine their alignment. Learn the basics of asana (posture) alignment, breath, intention & relaxation.

Vinyasa Yoga

A vinyasa practice links breath with movement and intention. In this training, you will learn the class structures you will learn for a Beginner Vinyasa sequence. In this practice you will flow through a balanced stream of postures including sun salutations, standing postures, backbends, forward bends, twists, inversions, relaxation and more. These are active practices that encourage focused intention, meditation, relaxation and spiritual growth through asana.

Taoist Yoga, focus on Yin

Based on the Chinese system of yoga, this style is used to enhance the flow of energy or chi through the body combining two approaches of teaching into one practice: one approach is yin – passive and restorative holds and the other approach is yang – active stretching and strengthening using fluid circular movements (as in a Vinyasa practice). This class sequence is created to focus more on Yin Yoga, increasing greater range of motion in the joints and stretching connective tissue.
